

## The March 2025 Eclipses

In 2025, we'll experience four eclipses that have the potential to usher in transformative revelations and exciting new beginnings. And those born under mutable sun signs, Gemini, Virgo, Sagittarius and Pisces, are likely to feel these lunation more powerfully.

On **March 14**, the total lunar eclipse in analytical Virgo came in, urging us to let go of any habits or organizational systems that no longer serve us. Under this lunar eclipse we could also become extra aware of our flaws and find that we're more sensitive to feedback. We need to release ourselves from perfectionism and accept that we need to make changes to move forward. Sometimes we need to live

with discomfort and really resign ourselves to the healing process.

During the partial solar eclipse, you may feel your need to start paving a new path for yourself in the courage sign of Aries. This occurs on March 29th.

At this time as the ego-ruling sun and intuition-guiding moon conjunct in the cardinal fire sign of Aries we'll receive power to pursue our highest goals with confidence. Listen to your inner voice as you strategize how you'll fulfill your destiny. This could be your chance to bring a long-held dream to fruition. Dreams are made in 1st sign of the zodiac, Aries during this eclipse.
